This book is a must-read for anyone serious about starting or running their own business. I have worn a number of different hats in the business and financing and investing world, and many times have had my hat handed back to me, if you know what I mean. Saying that, I wish I would have had this book a few years ago! As an entrepreneur and partner in a company that made early stage angel investments and participant in due diligence with angel investing groups, I have seen a number of things described in the book first-hand. I can honestly say that I wish I would have had this book read and sitting on my shelf as a valuable resource. This book covers it all with clear

language and presents things in a down-to-earth fashion that helps you understand the realities, pros, cons as well as the hidden dangers and "gotchas" that might be lurking in that contract in front of you or that longer-term impact you may have missed without their advice. You will find great ideas on where to obtain financing that you may not have considered and learn that some of your ideas for financing may not be the greatest for your long-term financial health, such as retirement financing where you pull from retirement accounts. Along with the information on financing, you can find some great tips on running a better business, keeping up with important paperwork and things that may not be much fun, but can really help when you get to a place where you want to grow and scale your business. A great chapter for everyone considering starting a business is "Chapter Eleven: Create Your Business Structure.
