Incredible LEGO Technic: Cars, Trucks, Robots & More!

Synopsis

From tanks to tow trucks, all the models showcased in this book use LEGO Technic gears, pulleys, pneumatics, and electric motors to really move. You'll find some of the world's best fan-created LEGO supercars, construction equipment, monster trucks, watercraft, and more, along with design notes and breakaway views of the truly incredible mechanisms inside. Look closely, and you'll learn how expert builders use differentials, suspensions, linkages, and complex gearing systems in their creations. Whether you're a beginning builder or a longtime LEGO fan, Incredible LEGO Technic offers a unique look at the artistry and engineering that can make your LEGO creations come alive.

Customer Reviews

Just a few years back it seemed like every LEGO Technic creation looked like a chunky girder bridge. Things have changed. The Technic models featured throughout this book are so realistic and technically accurate that you won't believe you are looking at a LEGO model. This book features page after page of eye-popping, full-color photography that makes every model practically fly,

screech or blast off the page. Author Pawel Sarel • Kmiec is one of the world's best LEGO Technic builders and this whole book feels like you are getting a personal tour of the world's best creations chosen by the master himself. It's important to note that this book does not teach building techniques, nor does it feature any step-by-step instructions. This book is about jaw-dropping admiration of some of the most technically complex but aesthetically pleasing LEGO models in the world. The book features 10 broad categories of Technic creations ranging from supercars to aircraft, farm equipment, heavy machinery, giant trucks and more. Every category is spectacular and most feature callouts, cutaways, exploded views or other details that let you appreciate the finer details of the model. While every model in each category pushes realistic building to the extreme, here are a few of my favorites and a sampling of what's inside this book:

1. An Eagle Westlake T1G Formula One car.
2. The Holmer Terra Dos T3 sugar beet harvester.
3. A Honda CBR1000RR Repsol racing motorcycle.
4. A Kawasaki Vulcan 800 cruising motorcycle.
5. The Koenigsegg CCX super car.
6. A K2 Black Panther tank.
7. A Kenworth W900L dump truck.
8. A Demag AC50-1 mobile crane.
