Customer Reviews

Keys of songs are modulated for the most efficient page space usage, but it's hard to beat the amount of songs you can play along with for the price. The only real downside is the terrible, cheapest binding. I would easily pay \$10 more for reasonable binding. Instead, every time I purchase some kind of songbook compendium (most especially these giant Hal Leonard tomes), I immediately take it to my local FedEx print store and have them cut and rebind it into two or three separate books, each ringbound (so they can open flat) with plastic sheet covers. It's well worth it. The difference being a book you will continue to use and one you leave on the shelf because the binding is all screwed up. There are many different decades/genres of songs and different years of

volumes. The overlap, if you glance over what's in each book, can be mitigated exponentially. A good practice tool at the least.

Great songs not common in other fake books. Easy to read, built to last. I hope they keep writing more like this one

This brings back so many memories, and I am looking forward to singing with my adult kids while they can play along. Great book!

Good music book. For me not enough old music, too much POP not enough Rock. Very thick and pages are very easy to read.
